

Aleksander Matusik

Cloud & DevOps Engineer (AWS)

Self-taught Cloud Engineer (AWS) with hands-on experience building serverless and containerized applications using Terraform, CI/CD and security-focused architecture. Developed and deployed multiple end-to-end AWS projects (portfolio website, auto-scaling traffic simulation, and authenticated journal app) available on GitHub. Cybersecurity background (AGH postgraduate studies, HTB Bug Bounty path) with strong focus on IAM, VPC design and secrets management. AWS Certified Cloud Practitioner, preparing for Solutions Architect Associate (SAA-C03). Actively seeking Junior Cloud/DevOps role to contribute and grow in production environments.

Education

2025-2026

Postgraduate - cybersecurity
AGH Institute of Informatics

2022-2025

Bachelor of National Security
ANS Nowy Targ

2018-2022

IT technician (EE.08, EE.09)

Skills

- Cloud: AWS (Lambda, S3, CloudFront, ECS, ECR, API, ALB, ASG, IAM)
- IaC: Terraform
- Containers: Docker, ECS
- DevOps: CI/CD, Linux, Bash
- Programming: Python (basic-intermediate), Bash
- Tools: Git, GitHub

Language

English (B2 - C1)

Polish (native)

Certifications

**AWS Certified Cloud
Practitioner (2026)**

**AWS Certified Solutions
Architect – Associate (In
progress / Expected Q3 2026)**

Projects

○ AWS PROJECTS

Serverless Portfolio Website (AWS)

- Built a fully serverless personal portfolio using S3 and CloudFront for static hosting
- Implemented visitor counter using API Gateway, Lambda and DynamoDB
- Configured custom domain (Namecheap) with ACM SSL
- Focus: cost-efficient serverless architecture
- Link: <https://github.com/matusikal/portfolio>

Daily Log – Containerized Journal App (AWS ECS)

- Developed journaling web app with email-based authentication
- Containerized with Docker and deployed using ECS and ECR. Backend connects to a PostgreSQL database on RDS inside private VPC
- Application secrets and database credentials managed through Secrets Manager
- Implemented CI/CD pipeline for automated deployments
- Traffic routed through API Gateway and ALB, served globally via Cloudfront
- Built completely in terraform
- Link: <https://github.com/matusikal/containers>

○ Auto-Scaling Traffic Simulator (AWS)

- Built interactive load simulation tool to demonstrate auto-scaling behavior
- Integrated ALB and Auto Scaling Groups to handle dynamic traffic spikes
- Real-time infrastructure scaling visualization
- Built completely in terraform
- Link: <https://github.com/matusikal/alb-asg-project>

Experience

○ Rusin-SKI IT support specialist (Seasonal)

Bukowina Tatrzańska | Dec 2024 – Mar 2026

- Diagnosed and resolved network and connectivity issues across ticketing terminals, parking systems and payment infrastructure
- Provided first-line technical support across multiple locations, prioritizing fixes under pressure
- Configured and maintained networking equipment

○ Municipal Guard (Straż Miejska) – IT Support student Intern

Szczawnica | Nov 2022 – Mar 2025

- ~1000 hours of IT internship experience
- Managed and updated electronic records and internal systems
- Created operational reports and maintained digital documentation workflows
- Worked with structured data in controlled environments

○ ELCRO – Technical Assistant Intern

Łącko | Apr 2021 – Jun 2021

- Assisted in debugging and configuration of electronic control systems
- Supported technical troubleshooting and device programming tasks

○ Nowy Targ County Office – IT Support Intern

- Nowy Targ | May 2020 – Jul 2020
- Supported internal IT infrastructure and basic network operations
- Assisted with system administration and user support tasks

I hereby give consent for my personal data included in my application to be processed for the purposes of the recruitment process under the European Parliament's and Council of the European Union Regulation on the Protection of Natural Persons as of 27 April 2016 (GDPR).
